

Conditions of Use of Fact Sheets

DRAINAGE, EROSION AND SEDIMENT CONTROL TECHNIQUE FACT SHEETS

CONDITIONS OF USE OF FACT SHEETS

Individuals or organisations that have paid the required fee to download a given fact sheet are given permission to use the fact sheet within their organisation or for personal use (as the case may be) provided:

- (i) The fact sheet is not distributed electronically to a third party.
- (ii) The fact sheet is not used in a manner that implies the contents (including images) are owned by any organisation other than indicated within the original document.
- (iii) The "Catchments & Creeks Pty Ltd" name remains within the document footer.
- (iv) The fact sheet is not uploaded onto a website or electronic distribution system.
- (v) There is no reverse engineering of the file; and the images are not scanned or otherwise extracted from the fact sheet for use within other publications.

The intellectual property rights for all fact sheets and their contents remains with Catchments & Creeks Pty Ltd in accordance with Australian law.

Fact sheets that are presented as 'free' downloads from the official wet site www.catchmentsandcreeks.com.au may be distributed electronically or in hard copy to a third party; however conditions (ii) to (v) shall apply.

DISCLAIMER

Significant effort has been taken to ensure that these fact sheets are representative of current best practice erosion and sediment control. The author however, cannot and does not claim that the fact sheets are without error, or that the recommendations presented within the fact sheets will not be subject to change in the future. When using these fact sheets, users should ensure that they are aware of the latest requirements of best practice erosion and sediment control.

Use of these fact sheets, including all technique sizing tables and hydraulic design parameters, requires professional interpretation and judgement. Appropriate investigation, planning, and design procedures must be applied in a manner commensurate with the complexity of the work activity and site conditions.

No warranty or guarantee, express, implied, or statutory is made as to the accuracy, reliability, suitability, or results of the methods or recommendations.

The author shall have no liability or responsibility to the user or any other person or entity with respect to any liability, loss, or damage caused, or alleged to be caused, directly or indirectly, by the adoption and use of the methods and recommendations of any part of these fact sheets, including, but not limited to, any interruption of service, loss of business or anticipatory profits, or consequential damages resulting from the use of the document.

Specifically, the adoption of these design procedures, guidelines and information will not guarantee:

- compliance with any statutory obligations;
- compliance with specific water quality objectives;
- avoidance of environmental harm or nuisance.
